Sports Premium Funding- Impact evaluation for the academic year 2016-17 (up to March 17)

<u>Key Objective</u>	<u>Positive impacts on staff development and pupil progress</u>
1. Working alongside the South Hunsley and Driffield Sports Partnerships	This year we have continued to work alongside the South Hunsley Schools Sports Partnership and the Driffield Sports Partnership giving our three schools the opportunity to take part in local sports events throughout the year. It is these competitions that motivate pupils to give their all in PE lessons, with the hope that they may represent the school and receive the plaudits of their peers. This also gives the children a chance to try new sporting activities that many of them have not had previously. We look to build good relationships with other schools from our cluster and participate in 'inter-school' competitions to access a range of different sporting activities.
2. Hiring of qualified sports coaches	The Sports Premium funding has given our Sports Development Officer the chance to work alongside our school staff when planning and delivering sessions. As well as providing the children with fun and challenging sessions, it has given our staff the chance to enhance their skills and understanding of PE. As a federation we have also used the Sports Premium to hire qualified sports professionals to work alongside our SDO and provide high quality training sessions for our staff members. This has included activities such as dance, archery, cricket and rugby giving our children a wide variety of sports that they can access throughout the year.

3. Participation in PE and community sports providers.	The SDO offers a minimum of one sports club after school or at lunchtime for each key stage. The clubs have been well attended with the children very excited to attend. As well as providing children with an afterschool club we also look to sign post children towards local sports clubs outside of school giving them the chance to develop their skills, whether this be joining a local football team and/or dance class. Working with a variety of sport coaches not only gives the children the chance to show their sporting potential but also has an impact on their well being. With an increase in extra-curricular activities we also hope to improve the children's focus and self-confidence which in turn will benefit the children in the school environment.
4. Purchasing equipment	The Sports Premium funding has allowed the accumulation of numerous pieces of PE equipment which has allowed a larger range of sports, activities and skills to be carried out across the federation. Along with the main stream sports such as football, netball and rugby, schools are now able to offer pupils the opportunity to try their hand at new and exciting sports such as dodgeball, archery, table-tennis, benchball and ultimate frisbee. It is through these sports that many pupils who have previously had a dislike for sport in school, can find something they enjoy and change their perceptions with regard to being active and healthy.
